

APL LOGISTICS MANAGING SUPPLY CHAIN COMPLEXITY

In today's world, managing an efficient supply chain is especially challenging. APL Logistics stands ready with the expertise and tools

needed to help you monitor and manage your supply chain, with **Logistics SuperSuite Plus (LSS+)**.

HOW LSS+ WORKS FOR YOU

Logistics SuperSuite Plus is a proprietary platform that delivers seamless, end-to-end integration across your supply chain – from Order Management to Destination Services. LSS+ combines the functionality of a core operating system with industry-leading data analytics and optimization.

LSS + provides tools to connect all your key stakeholders, helping you collaborate efficiently and stay on top of your ever-changing supply chain.

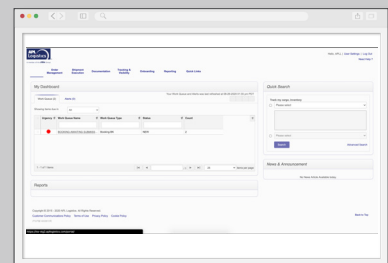

LSS+ products and services fall into four categories:

- Vendor Collaboration
- Shipment Planning
- Visibility & Reporting
- Analytics

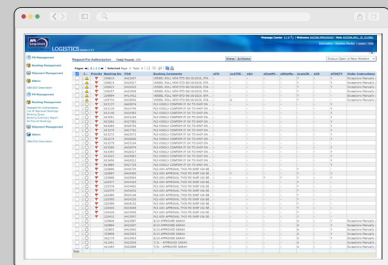

VENDOR COLLABORATION

The Vendor Collaboration portal provides a full service menu to support your suppliers. Vendors, factories and agents have user-role specific access, so responsible parties can focus on relevant information and tasks, such as order allocations, production tracking, label printing, booking, document submission, and more.

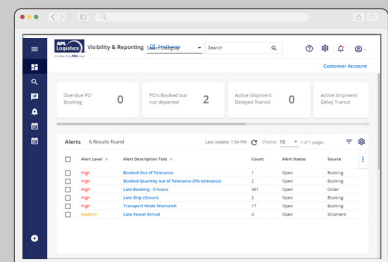

VENDOR COLLABORATION

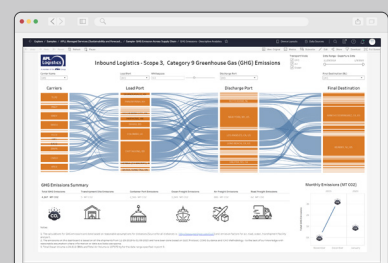

SHIPMENT PLANNING

VISIBILITY & REPORTING

ANALYTICS

SHIPMENT PLANNING

Our Shipment Planning tools organize and streamline the way your business rules are applied, ensuring the most efficient shipment methods. As your business grows our technology makes scaling and collaboration easy.

- Streamline your processes
- Cut down on email traffic
- Leverage technology to scale up

VISIBILITY & REPORTING

Tracking orders couldn't be easier with our integrated visibility, user-friendly custom report builder as well as standard report templates, and automated alerts that offer a quick overview of areas that need attention.

LSS+ provides a control tower view into your supply chain and a dynamic work queue to support your decision-making process.

ANALYTICS

APL Logistics has resources to help fast track your analytics projects. Whether it is measuring metrics or KPI's, creating visualizations to tell a story, or deploying more advanced concepts like machine learning or AI, we have the talent, expertise and infrastructure to solve problems and provide insights.

Customers automatically receive dashboards in LSS+ to measure all of the standard logistics KPI's such as utilization, volume, vendor, origin and planning performance, but that is just the start of our Analytics capabilities. Below is a sample of the unmatched game changing analytics we provide:

- ERP Lead Time Analysis and recommendations
- Forecasting volume and allocations (using machine learning)
- GHG Emissions Calculations and Mitigation
