

REGIONAL NETWORK UPDATE COVID-19

REGIONAL NETWORK UPDATE: VIETNAM

February 5, 2021

Below updates:

- As of February 4, 2021, Vietnam has reported 37 more local COVID-19 infections in a fresh outbreak, linked to a factory in the northern province of Hai Duong.
- The key provinces which have the highest cases are Quang Ninh and Hai Duong. Local authorities have tightened the COVID-19 measures in these areas as of date of Advisory.
- There is currently **no impact** on our customers' shipment or delivery.

The local port, CFS, and office in Haiphong are operating as usual.

We will continue to monitor the situation. If you have any further questions or concerns, please contact your APL Logistics Account Manager or local APL Logistics office.

Please refer to the [COVID-19 Operational Status Matrix here](#) for most recent detailed regional updates.

Global cases can be tracked [by accessing this live map created by Johns Hopkins University](#).
