

## UPDATE 1: EVER GIVEN CONTAINER VESSEL GROUNDING IN THE SUEZ CANAL

March 26, 2021,

Dear Valued Customer,

This update follows our [March 24, 2021, Advisory](#). At the time of this publication, [Evergreen's most recent Update](#) is that efforts to float the vessel have been unsuccessful. On-scene mitigation efforts continue with the utmost urgency.

We are also aware that multiple carriers have provided notice of potential delays of vessels in the area. As the situation is extremely fluid, it currently is not feasible to identify all potentially impacted vessels. We urge you to continue checking directly with carriers for your carrier-direct shipments. For APL Logistics shipments, we are tracking ETA's and will communicate directly with customers regarding any potential impacts.

If you have further questions or concerns, please contact your APL Logistics Account Manager or local APL Logistics office.

Sincerely,

APL Logistics
