

CUSTOMER ADVISORY

SEVERE FLOODING IMPACTS OPERATIONS IN THE PACIFIC NORTHWEST

November 18, 2021,

Dear Valued Customer,

As reported in media outlets, northwestern Washington State (U.S.) and British Columbia (Canada) have experienced heavy rain over the last several days, causing landslides and flooded highways.

The inclement weather has resulted in severe delays and service disruptions across the supply chain network. The Vancouver gateway is experiencing significant rail and trucking disruptions, with highway routes leading to Metro Vancouver closed. Railways are currently assessing damage and conducting repairs. The CN and CP rail corridors running between Vancouver and Kamloops are not currently operational. However, the Port of Vancouver terminals are still operating.

For more information, please see the resources below:

We will continue to monitor the situation and send additional updates as needed. If you have any further questions or concerns, please contact your APL Logistics Account Manager or local APL Logistics office.

Sincerely,
APL Logistics
