Automotive Ro-Ro Solutions

Flexible, Neutral Ro-Ro Freight
for Finished Vehicles

APL Logistics provides flexible Roll on/Roll off (Ro-Ro) solutions for finished vehicles, machinery, and high and heavy cargo. As a carrier neutral logistics provider, we design and orchestrate Ro-Ro solutions that secure capacity, adapt to market volatility, and connect all stakeholders across the finished vehicle supply chain.

Why Work with APL Logistics

Carrier Neutral Capacity Access

We secure Ro-Ro capacity across a diverse range of global and regional carriers, offering flexibility and resilience in volatile markets.

Solution Design

Ro-Ro, container, or multimodal — we design the right solution based on cost, risk, lead time, and demand.

End to End Orchestration

From factory gate to showroom, we manage inland transport, port handling, customs, ocean freight, and destination delivery priced by vehicle.

Full Visibility & Collaboration

Shipment and VIN level visibility with near-real-time milestone tracking.

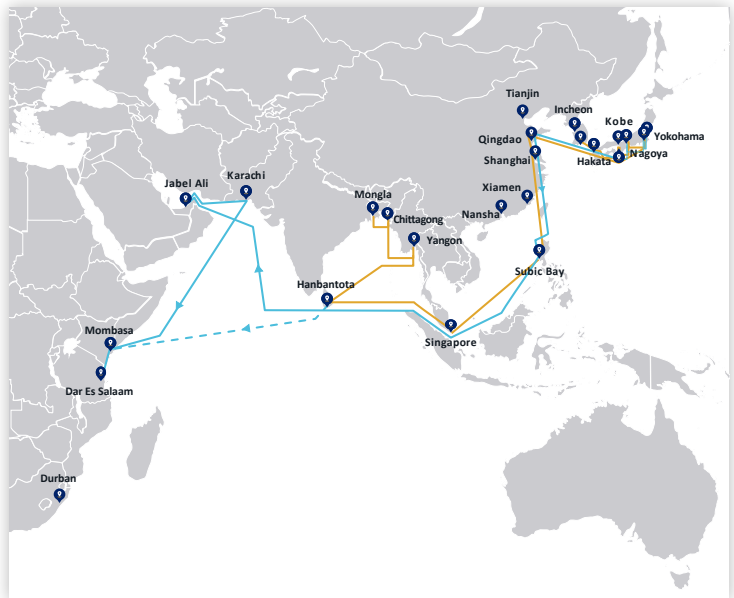

Multi-type Powertrain Expertise

Extensive experience handling electric, hybrid, and ICE vehicles, including compliant handling, documentation, and operational controls as per global and local regulations.

Service Coverage

Flexible Ro-Ro solutions connecting Asia Production with International Demand

China to Bengal

— Main Route

China to Middle East

— Main Route — Second Route

Additional port calls may be arranged upon request.
